ASSIGNMENT: 1

Define a problem statement & give a brief executive summary snapshot.
A) Executive summary
B) Project Description
C) Project Scope.

Executive Summary

→ In this developing era, nowdays somewhere many vast population rural areas are there where public is facing problems for surviving daily workers, students facing so much problems specialy in monsoon season because their is no transit facilities are available mainly due to the particular area having proper road, streets, and many other problems.

PROJECT DESCRIPTION {Finding, Analysis, Deliverable}

As we discussed and analysed their, its vast population area so we can't go one-by-one to discuss the problem solutions & reach it out to gov-management, so we notable to reach goverinment managent put our problem infornt of them. So we will create an Application and website through which peaple will discuss their problem together which is related gov-mangemen on that website publicaly so that it will reach to management fastly and will be, let it be any kind of problem related to gov.

PROJECT SCOPE

- To provide better facilities to the public
- Get their problem on the Application and web-site till gov-management
- 80% of public is facing the problem of rural area
- Through Application problem must be solved
- We will add more & different kind of feature so the public problems also will be solved and Application & website owner will be also in profit as much as the public problems solved the app will be used more.
